Define the problem statement

Team ID	PNT2022TMID00383
Project Name	Industry-specific intelligent fire management system – Oil Industry
Maximum Marks	2 Marks

I am	A customer	I need a practical and robust fire management system to be deployed in oil industry
I am trying to	Guarantee fire safety in my industry	I must prevent the loss of life and property and ensure a smooth operation
But	I want to deploy an efficient model	By developing an automated system with less response time
Because	The fire outbreak must be detected at the earliest	As oil and gas are intensely affected by fire
Which makes me feel	That my Industry operation is efficient	And my workers are safe and peaceful
